**SECUREFILL
SERIES**

The Securefill Series is designed for use with highly potent and/or toxic formulations requiring Occupational Exposure Limit (OEL) levels of up to 5 (such as oncology, biopharmaceuticals, antivirals, and other high-potency compounds). The machines have an isolating design with RTP ports, HEPA filters, glove ports, and accurate dosing mechanisms. Further, a wet-in-place (WIP) system ensures the wetting of all loose particulates in the pharma zone, thereby safeguarding both the operator and environment. The output capacity is 6000-25,000 capsules/h.
