

Q.staxx A109

Analog Output Module with Digital I/Os

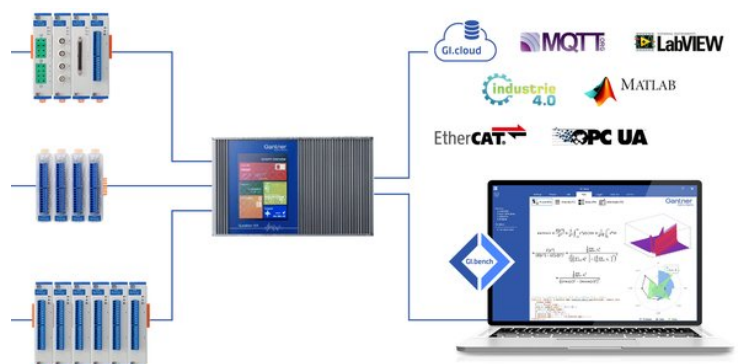

Q.staxx brings the high precision and performance of Q.bloxx into robust, pallet mount, cast aluminum (IP65) Harting enclosures - the ideal solution for extremely harsh test cell environments. Q.staxx modules are interchangeable and can be mounted directly onto pallet systems since the passive backplane does not require fans, filters or environmental conditioning further reducing setup time as sensors can remain fixed to an engine while the pallet transitions between test cells and measurement requirements.

- IP 65 (Dust Protected and water jet tested)
- Robust design for Pallet Systems
- Connectable to any Controller, e. g. Q.gate or Q.pac
- Power supply 10 ... 30 VDC
