PT510

Instrument Grade • 0..5 Vdc / 0..10 Vdc

Absolute Linear Position • Classic Stringpot Design Stroke Range Options: 0-2 to 0-100 inches **Powder Painted & Anodized Aluminum Enclosure Industrial Automation & Testing Applications**

GENERAL

Full Stroke Range Options	0-2 to 0-100 inches
Output Signal Options	05, 010 VDC
Accuracy	see ordering information
Repeatability	$\pm0.05\%$ full stroke
Resolution	essentially infinite
Measuring Cable	see ordering information
Enclosure Material	powder-painted and anodized aluminum
Sensor	plastic-hybrid precision potentiometer
Potentiometer Cycle Life	see ordering information
Maximum Retraction Acceler	ration see ordering information
Weight	2 lbs. max.

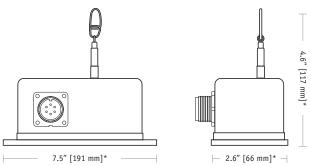

ELECTRICAL

Input	see ordering information					
Input Current	10 mA maximum					
Output Impedence	1000 ohms					
Maximum Load	5000 ohms					
Signal Adjustment, Zero from factor	y set zero to 50% of full stroke range					
Signal Adjustment, Span	to 50% of factory set span					

ENVIRONMENTAL

Enclosure	IP50, NEMA 1
Operating Temperature	-40° to 200°F (-40° to 90°C)
Vibration	up to 10 g to 2000 Hz maximum

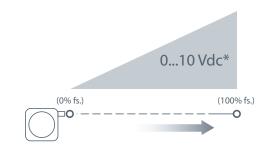

*50-inch range model, dimensions may differ for other ranges

Based on Celesco's original string pot design dating back to the late 1960's, the PT510 has become a standard throughout the years for literally thousands of applications including aircraft structural testing, hydraulic cylinder control, valve stem opening, and factory automation.

Available in full stroke ranges up to 100-inches, the PT510 provides a regulated voltage feedback signal linearly proportional to the position of its traveling stainless steel measuring cable. Output signal options include 0-5 and 0-10 vdc.

Electrical Output Signal

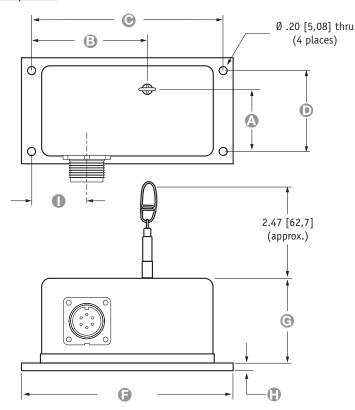

*Additional Output Options: 0...5, -5...+5, -10...+10 Vdc

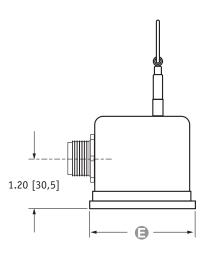

20630 Plummer Street • Chatsworth, CA 91311

Output Signal Selection:

The output signal direction can be reversed at any time by simply changing the dip-switch settings found on the internal signal board. After the settings have been changed, adjustment of the Zero and Span trimpots will be required to precisely match signal values to the beginning and end points of the stroke.

To gain access to the signal board, remove the two 4-40 screws on top and lift up cover.
