The PT9420 is a great value for demanding long-range applications requiring a 4-20 mA linear position feedback signal. Sealed to meet NEMA 4 standards, this Cable-Extension Transducer will perform even under the harshest of environmental conditions.

As a member of our innovative family of NEMA-4 rated cable-extension transducers, the PT9420 offers numerous benefits. It installs in minutes, functions properly without perfectly parallel alignment, and when its cable is retracted, it measures only 6".

Output Signal:

*Optional 3-wire, 0...20mA output signal available.

Output Signal Selection (not available with intrinsically safe option):
$\qquad$ output signal $\qquad$ switch setting

The output signal direction can be reversed at any time by simply changing the dip-switch settings found on the internal signal board. After the settings have been changed, adjustment of the Zero and Span trimpots will be required to precisely match signal values to the beginning and end points of the stroke.
signal board

To gain access to the signal board, remove four Allen-Head Screws and remove end cover bracket.

## VLS Option - Free Release Protection

The patented Celesco Velocity Limiting System (VLS) is an option for PT9000 Series cable extension transducers that limits cable retraction to a safe 40 to 55 inches per second for the single spring option and 40 to 80 inches per second for the higher tension dual spring option.

The VLS option prevents the measuring cable from ever reaching a damaging velocity during an accidental free release. This option is ideal for mobile applications that require frequent cable disconnection and reconnection. It prevents expensive unscheduled downtime due to accidental cable mishandling or attachment failure.

How To Configure Model Number for VLS Option:
VLS 9420 -
$-]_{0}^{-}{ }^{-}$
©
$\boldsymbol{\top}-\boldsymbol{\top}$
creating VLS model number (example)...

1. select PT9420 model

PT9420-0100-111-1110
2. remove " PT " from the model number PX 9420-0100-111-1110
3. add "VLS"

VLS + 9420-0100-111-1110

    Caution! Do Not Remove Spring-Side End Cover
    Removing spring-side end cover could cause spring to become unseated and permanently damaged.
